- **Utilitarianism:** Happiness as the greatest good for the greatest number, emphasizing collective well-being.

These perspectives highlight that happiness can be viewed as both an external state of pleasure and an internal condition of virtue or resilience.

Modern psychology approaches happiness through empirical research, often categorizing it into:

- **Subjective Well-Being:** Personal evaluations of life satisfaction combined with emotional experiences.
- **Psychological Flourishing:** A broader concept including positive relationships, purpose, and personal growth.

Research indicates that happiness encompasses both positive emotions and a sense of meaning, suggesting that a balanced life involves more than fleeting pleasures.

Cultural and Social Variations

Different cultures interpret happiness uniquely:

- **Western societies:** Often emphasize individual achievement, personal freedom, and material success.
