What Is Fear of Intimacy?

Fear of intimacy refers to an individual's deep-seated apprehension or anxiety about forming close, trusting, and emotionally vulnerable relationships with others. It's not merely about shyness or introversion but involves a complex interplay of emotional, psychological, and sometimes even physical reactions that hinder the development of intimacy.

- Avoid getting too close emotionally
- Hesitate to share personal thoughts or feelings
- Maintain physical or emotional distance
- Experience discomfort or panic at the idea of vulnerability

This fear can manifest in various types of relationships, including romantic partnerships, friendships, and even familial bonds.

Why Does Fear of Intimacy Occur?
