Question 1: Multiple Choice

Which of the following crops is classified as a leguminous crop?

- a) Maize
- b) Cowpea
- c) Rice
- d) Sweet potato

Answer: b) Cowpea

Explanation: Cowpea is a leguminous crop known for its ability to fix atmospheric nitrogen, which helps improve soil fertility. It is commonly cultivated in West Africa and is a vital source of protein.

Question 2: Short Answer

Briefly explain two methods of land clearing used in preparation for planting.

Answer:

- Manual Clearing: Using hand tools such as cutlasses, hoes, and axes to remove bushes, shrubs, and trees. This method is labor-intensive but suitable for small plots.
- Mechanical Clearing: Employing machinery such as bulldozers or tractors with clearing attachments to remove large vegetation quickly and efficiently, suitable for large-scale farms.

Explanation: Land clearing is essential for weed and bush control, ensuring the land is suitable for planting. The method chosen depends on the size of the farm, available resources, and environmental considerations.

Question 3: Essay Question

Discuss the importance of crop rotation in sustainable agriculture.

Answer:

Crop rotation is a farming practice where different crops are planted in the same area across seasons or years. Its importance in sustainable agriculture includes:

- Soil Fertility Maintenance: Rotating crops, especially legumes, helps replenish soil nutrients, reducing reliance on chemical fertilizers.

- Pest and Disease Control: Changing crops disrupts the life cycles of pests and diseases specific to certain plants, reducing infestations.
- Prevention of Soil Erosion: Diverse root systems in different crops help protect the soil from erosion.
- Enhanced Biodiversity: Crop rotation promotes a variety of organisms in the soil, which contributes to soil health.
- Economic Benefits: Diversification reduces risk; if one crop fails, others can provide income.

Crop rotation thus sustains productivity while conserving resources, making it a cornerstone of environmentally friendly farming.
