The Major Human Body Systems

1. Skeletal System

The skeletal system provides the framework for the body, supporting tissues and organs. It also protects vital organs, enables movement with muscles, produces blood cells, and stores minerals.

Key Components

- Bones
- Cartilage
- Ligaments
- Joints

Major Bones to Know

- Skull
- Vertebral column (spine)
- Ribs
- Limbs (humerus, femur, radius, ulna, etc.)
- Pelvic girdle

2. Muscular System

This system allows movement, maintains posture, and produces heat. Muscles are classified into three types: skeletal, smooth, and cardiac.

Skeletal Muscles

These are voluntary muscles attached to bones, enabling movement.

How Muscles Work

Muscles contract to pull on bones, causing movement. They work in pairs (agonist and antagonist) to facilitate motion.

3. Nervous System

The nervous system controls and coordinates body activities. It includes the brain, spinal cord, nerves, and sensory organs.

Functions

How It Works

The heart pumps oxygenated blood via arteries, delivers nutrients, and returns deoxygenated blood through veins to the lungs for oxygenation.

5. Respiratory System

Responsible for gas exchange, it supplies oxygen to the blood and removes carbon dioxide.

Key Structures

- Nose and nasal cavity

- Trachea
- Lungs
- Alveoli (tiny air sacs in lungs)

Process

Air enters via the nose, passes through the trachea, and reaches the lungs where oxygen diffuses into the blood; carbon dioxide follows the reverse path.

6. Digestive System

This system breaks down food, absorbs nutrients, and eliminates waste.

Major Organs

- Mouth
- Esophagus
- Stomach
- Small intestine
- Large intestine
- Liver
- Pancreas

Digestive Process

Food is chewed and swallowed, digested in the stomach and intestines, nutrients are absorbed, and waste is expelled.

7. Urinary System

Responsible for removing waste products and balancing body fluids.

Major Components

- Kidneys
- Ureters
- Bladder
- Urethra

Function

Filters blood to produce urine, regulating water, salt, and pH levels.

8. Reproductive System

Enables reproduction and sexual function.

Male Reproductive Organs

- Testes
